Our SL1000 has been designed specifically for the most demanding customer environment. In addition to robust and stylish construction, this equipment has the capability required to deliver gourmet coffee day after day. All drinks selections are completely user adjustable to deliver the perfect drink for every consumer. With a choice of four different brewing methods you can match the equipment to your specific environment. The equipment has capacity for 1,000 cups and can make the highest quality tea and coffee available in the marketplace. The wide range of products will soon make the SL1000 a firm favourite in your environment. In addition the SL1000 can be configured to provide filtered cold water and carbonated drinks. Other features of the SL1000 include a jug facility for hospitality or high volume environments.
